

that would disable an adult, and that you are disabled.

(i) The term “substantial loss or deficit” is not a precise number, percentage, or quantitative measure.

(ii) *Substantial loss or deficit* means that you are unable to meet the basic physical demands of at least sedentary work (as defined in §416.967(a)); or you are unable to meet the basic mental demands of at least unskilled work (as defined in §416.968(a)); or that you have an impairment(s) that would severely limit the potential occupational base of a person age 18 through 45 and that would justify a finding of inability to perform other work even for a person with favorable age, education, and work experience (see §§416.969, 416.969a, and appendix 2 to subpart P of part 404 of this chapter).

[58 FR 47584, Sept. 9, 1993]

EFFECTIVE DATE NOTE: At 62 FR 6424, Feb. 11, 1997, §416.924e was removed, effective Apr. 14, 1997.

MEDICAL CONSIDERATIONS

§ 416.925 Listing of Impairments in appendix 1 of subpart P of part 404 of this chapter.

(a) *Purpose of the Listing of Impairments.* The Listing of Impairments describes, for each of the major body systems, impairments that are considered severe enough to prevent an adult from doing any gainful activity or, for a child, that causes marked and severe functional limitations. Most of the listed impairments are permanent or expected to result in death, or a specific statement of duration is made. For all others, the evidence must show that the impairment has lasted or is expected to last for a continuous period of at least 12 months.

(b) *Adult and childhood diseases.* The Listing of Impairments consists of two parts:

(1) *Part A* contains medical criteria that apply to adult persons age 18 and over. The medical criteria in part A may also be applied in evaluating impairments in persons under age 18 if the disease processes have a similar effect on adults and younger persons.

(2) *Part B* contains additional medical criteria that apply only to the evaluation of impairments of persons under

age 18. Certain criteria in part A do not give appropriate consideration to the particular effects of the disease processes in childhood; i.e., when the disease process is generally found only in children or when the disease process differs in its effect on children than on adults. Additional criteria are included in part B, and the impairment categories are, to the extent possible, numbered to maintain a relationship with their counterparts in part A. In evaluating disability for a person under age 18, part B will be used first. If the medical criteria in part B do not apply, then the medical criteria in part A will be used. Although the severity criteria in Part B of the Listing of Impairments are expressed in different ways for different impairments, the level of severity for impairments listed in part B is intended to be the same as that expressed in the functional severity criteria of the childhood mental disorders listings. (See listings 112.01 ff. of appendix 1 of subpart P of part 404 of this chapter.) Therefore, in general, a child's impairment(s) is of “listing-level severity” if it causes marked limitations in two broad areas of functioning or extreme limitations in one such area. (See §416.926a for definition of the terms *marked* and *extreme* as they apply to children.) However, when we decide whether your impairment(s) meets the requirements for any listed impairment, we will decide that your impairment is of “listing-level severity” even if it does not result in marked limitations in two broad areas of functioning, or extreme limitations in one such area, if the listing that we apply does not require such limitations to establish that an impairment(s) is disabling.

(c) *How to use the Listing of Impairments.* Each section of the Listing of Impairments has a general introduction containing definitions of key concepts used in that section. Certain specific medical findings, some of which are required in establishing a diagnosis or in confirming the existence of an impairment for the purpose of this Listing, are also given in the narrative introduction. If the medical findings needed to support a diagnosis are not given in the introduction or elsewhere in the listing, the diagnosis must still be established on the basis of medically

acceptable clinical and laboratory diagnostic techniques. Following the introduction in each section, the required level of severity of impairment is shown under “Category of Impairments” by one or more sets of medical findings. The medical findings consist of symptoms, signs, and laboratory findings.

(d) *Diagnoses of impairments.* We will not consider your impairment to be one listed in appendix 1 of subpart P of part 404 of this chapter solely because it has the diagnosis of a listed impairment. It must also have the findings shown in the Listing for that impairment.

(e) *Addiction to alcohol or drugs.* If you have a condition diagnosed as addiction to alcohol or drugs, this will not, by itself, be a basis for determining whether you are, or are not, disabled. As with any other medical condition, we will decide whether you are disabled based on symptoms, signs, and laboratory findings.

(f) *Symptoms as criteria of listed impairment(s).* Some listed impairment(s) include symptoms usually associated with those impairment(s) as criteria. Generally, when a symptom is one of the criteria in a listed impairment, it is only necessary that the symptom be present in combination with the other criteria. It is not necessary, unless the listing specifically states otherwise, to provide information about the intensity, persistence or limiting effects of the symptom as long as all other findings required by the specific listing are present.

[45 FR 55621, Aug. 20, 1980, as amended at 56 FR 57944, Nov. 14, 1991; 62 FR 6424, Feb. 11, 1997; 62 FR 13539, Mar. 21, 1997]

EFFECTIVE DATE NOTE: At 62 FR 6424, Feb. 11, 1997, § 416.925, was amended by revising paragraph (a) and adding five sentences to the end of paragraph (b)(2), effective Apr. 14, 1997. For the convenience of the user, the superseded text is set forth as follows:

§ 416.925 Listing of Impairments in appendix 1 of subpart P of part 404 of this chapter.

(a) *Purpose of the Listing of Impairments.* The Listing of Impairments describes, for each of the major body systems, impairments which are considered severe enough to prevent a person from doing any gainful activity. Most of the listed impairments are permanent or expected to result in death, or

a specific statement of duration is made. For all others, the evidence must show that the impairment has lasted or is expected to last for a continuous period of at least 12 months.

* * * * *

§ 416.926 Medical equivalence for adults and children.

(a) *How medical equivalence is determined.* We will decide that your impairment(s) is medically equivalent to a listed impairment in appendix 1 of subpart P of part 404 of this chapter if the medical findings are at least equal in severity and duration to the listed findings. We will compare the symptoms, signs, and laboratory findings about your impairment(s), as shown in the medical evidence we have about your claim, with the corresponding medical criteria shown for any listed impairment. When we make a finding regarding medical equivalence, we will consider all relevant evidence in your case record. Medical equivalence can be found in two ways:

(1)(i) If you have an impairment that is described in the Listing of Impairments in appendix 1 of subpart P of part 404 of this chapter, but—

(A) You do not exhibit one or more of the medical findings specified in the particular listing, or

(B) You exhibit all of the medical findings, but one or more of the findings is not as severe as specified in the listing;

(ii) We will nevertheless find that your impairment is medically equivalent to that listing if you have other medical findings related to your impairment that are at least of equal medical significance.

(2) If you have an impairment that is not described in the Listing of Impairments in appendix 1, or you have a combination of impairments, no one of which meets or is medically equivalent to a listing, we will compare your medical findings with those for closely analogous listed impairments. If the medical findings related to your impairment(s) are at least of equal medical significance to those of a listed impairment, we will find that your impairment(s) is medically equivalent to the analogous listing.
